Patent Metallic Sole. 'A NEW INVENTION.

SEELY'S

Warring rus Fear is the most prelific cause of disease and death known to humanity. It is almost sure to bring on a coid ; and colds, neglected, and often when not neglected, lead to fevers or the coughe and fatal communitions. It is in recognition of this trath that the invontive talent of the country has no years been dovising some mathed, or attempting to devise it, for keeping the feet dry, and yet that should not give inconvenience to the wearer. Bubber shoes, an one form or another have hitherto been our reliance; but it is well known as among their many evilt that while they keep the feet dry from external moisture, they sweat them over much, and by thus inducing an undue tenderness increase a susceptibility to colds rather than otherwise. They are also cumbersome to the feet, and withal are very expensive. The demand is for something that shall make the ordinary Boot and Shoe impervious to water, without affecting their elogance or durability, and, if possible, without adding sensibly to the cost of their manufacture. These, it will be conceded, are assot impertant features, and we conscientiously affirm that they are absoluted pattained in the invention herewith presented to the public.

The invention consists in inserting between the ming factiolity with toughness, very light, and surry may adapted to the end desired, while the action are expense is merely mention of the consistence of their manufacture may adapted to the soft may be exposed ever to dampness, though the feet may be exposed ever to dampness, though the feet may be exposed ever to dampness, though the feet may be exposed ever to dam protection to the feet.

Tree Sides have already been tried by the best of all tests, actual use and the testimonials to their marile, freely preferred, indicate that they must be speed in and universally acopted by the public. GAS APPARATUS,

(Patented May 5th, 1962.

Lighting with Gas, Churches, Hotels, Private Dwellings, Workshops and Factories.

- FOR-

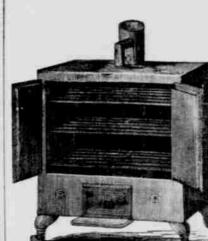

Warranted to give a superior light at one half the expense of ordinary coal gas.

We would call the attention of the public to the merits of this Machine, as seen in constant operation at our salesroom, believing that it needs but to be understood to come into very general use with all who appreciate the value of aefast rate gas light, which can be obtained at a cost not exceeding that of the light obtained from Kersene Oil.

Many ingenious methods have been adopted for enabling individuals to manufecture their own gas. The use of any of these methods involves a large outlay, for the construction of the works and buildings to contain them, a constant care and, no meansidership labor and expense on averating them and keeping them in repair. We think the Automatic Gas Machine is free from any of these objections. Call and examine.

BLODGETT & SWEET'S Patent Galvenized

PORTABLE OVEN,

For Hotels, Steamers & Private Families,

COOK WITH LESS FUEL THAN

ANY OTHER OVEN IN ESE. It is a perfect Oven, doing everything required of it in the most superfer manner. It will reast, at the same time, as many different kinds of mean as the oven can contain, and each piece will be perfectly sweet and free from the gases arising from the different varieties, as the gases arising from the different varieties, as the gases are let of through an excape pipe at the top. For Eaking Bread and Pastry, this Owen is without a tival. The material from which it is manufactured being a non-conductor and constructed with air-chambers there is no radiation of heat, and a small quantity of feel will keep it going for hours. Nos a and a are especially adapted to the use of Private Families, being furnished with a small cleak Saue, by means of which all the codding for an ordinary family can be readily done. It is substantially made of American Galvanized Iron, which will neither rust or burn out, and the Oven will last for years.
